There are no surprises.

Priority Control as a Service

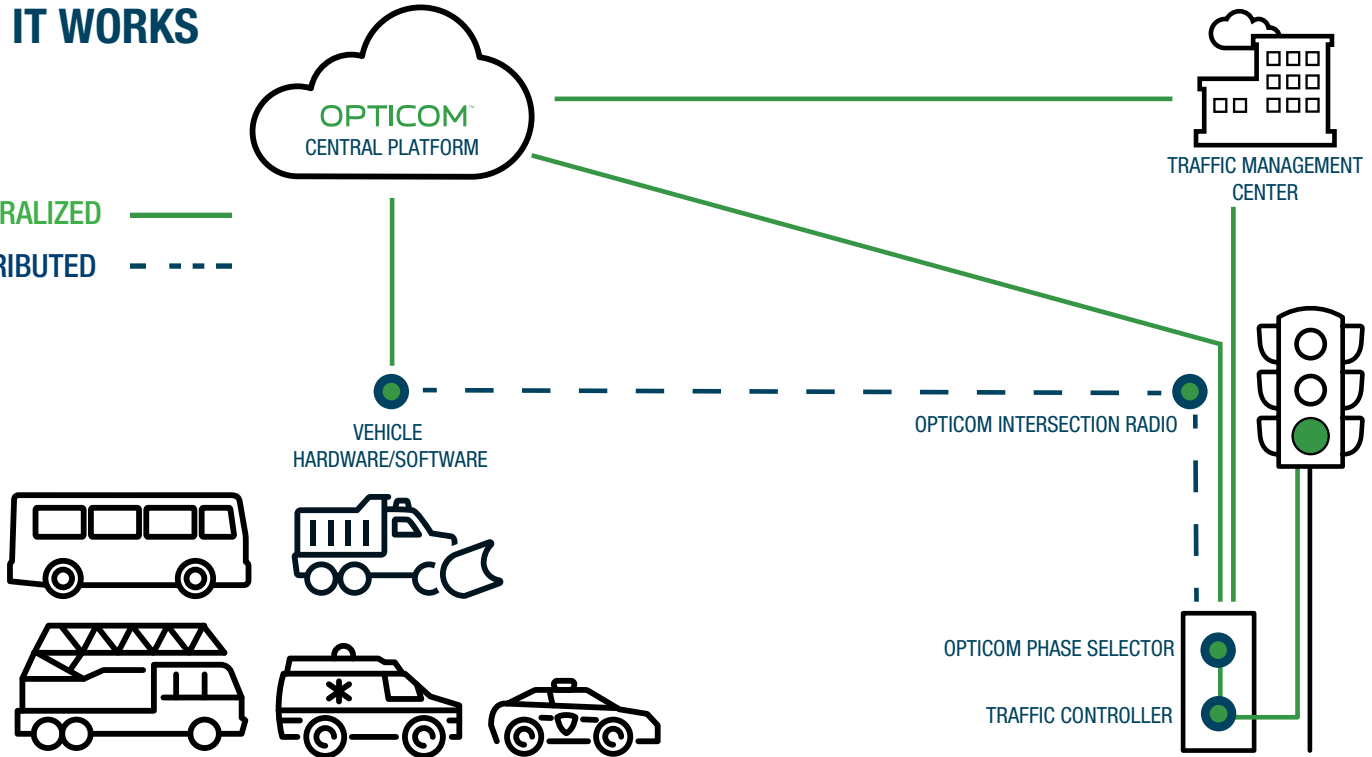

BENEFITS

Flexible deployment
leverages existing infrastructure,
giving you
faster return on investment

HOW IT WORKS

CENTRALIZED ———
DISTRIBUTED - - - -

A COMPREHENSIVE SOLUTION

GTT TAKES CARE OF EVERYTHING

Preparation, configuration and installation

GTT manages the entire project from site survey to go-live, including any necessary installation and training.

Secure hosting

Software is installed on a remote, secure third-party server, with all maintenance covered by GTT.

System monitoring

GTT ensures operational status and deploys repair resources as needed. GTT will also notify you about opportunities for optimization.

Help desk

GTT's customer care team strives to respond to critical issues within the business hour and aims for resolution the same business day.

TRUSTED EXPERTISE.
TIRELESS INNOVATION.
TOTAL ASSURANCE.

For over 50 years, more than 3,100 cities worldwide have trusted GTT to deliver reliable priority control solutions.

You can be confident the Opticom solution you choose today will continue to meet your needs, even as technologies evolve.

By designing flexible, scalable solutions built for interoperability, reliability and sustainability, GTT lets you focus on doing what you do best.
